

# HP500

less wastage, higher yield

# HP500

With a 9000' roll, multi-layer polymer technology and up to 350% stretch, HP500 is a new generation premium stretch film designed for modern power pre-stretch pallet wrapping machines.

## faster

longer roll and higher yield mean less roll changes  
less film breakages means less disruption

## greener

dramatically reduces weight per pallet used  
less cores and outer packaging to dispose of

## safer

highly puncture proof  
greater pallet security and stability

## better

high force to load  
high clarity - better presentation and barcode scanning
